

Before&After®

Who we are

Before & After magazine (www.bamagazine.com) has been sharing its practical approach to graphic design since 1990. Because our modern world has made designers of us all (ready or not), Before & After is dedicated to making graphic design understandable, useful and even fun for everyone.

Our color wheel

This color wheel is exactly the one we use in Before & After magazine. It is a reference tool, not an interactive product. Its purpose is to help you understand how colors are related. Its 12 hues and 48 tints represent the full spectrum of color but are only a tiny fraction of the infinity of colors actually in nature.

To learn more about the color wheel's basic construction and use, go to www.bamagazine.com and look for article "0646 Our color wheel."
